

BEADS & DOTS

THE MONTHLY NEWSLETTER PRODUCED BY ADSOL UK

Welcome to the February 2017 BEADS & DOTS; the monthly newsletter from the team at ADSOL UK. Each month, we will keep you up to date with the latest news and information related to ADSOL UK, *The Hot Glue Machinery Experts*, and our leading Meler hot melt equipment.

Whether you use Meler equipment or other (such as **Nordson**), we can support you and save you money. Also watch out for our hot alerts; if we have bite-size chunks of information that we believe will help and inform you we will get it over to you.

Best Wishes, from the ADSOL Team.

ALL OF OUR TANKS COME WITH A
**24 MONTH
GUARANTEE**

THE IMPORTANCE OF GOOD FILTRATION

The average hot melt system runs with at least 3 filters at a minimum so it is very important to your production that you take filtration seriously. Filtration is often overlooked. Filters can clog up which will reduce efficient glue flow and can even prevent pumping entirely. It is also important that your hot melt doesn't get contaminated by dust, debris and and char.

Ideally you should have your systems serviced regularly including the replacement of the filters. Contact us now about taking out a service agreement or ask us about prices on new filters.

ADSOL UK excel at Driving Down Risk

The ADSOL UK team who drive as part of their job recently undertook an excellent driving course with Steve Tams of **Driving Down Risk Ltd**. Our drivers passed with gold standard ratings, with Ste Highton scoring 41 out of 42 and being declared driver of the month!

Featured Product: Meler MU Series Applicators

A built-in filter reduces cold spots that can occur with inline filtration and makes maintenance even easier. The MU Series applicators are versatile and dependable, its simple yet effective design allows it to be quickly configured to your needs.

Case Study: Micron 5/4 for a Brewery

This week, a leading Cornwall-based Brewery has replaced their aging non-Meler tank with one of our Micron 5 litre tanks (with 4 hose ports). Their system was getting old and tired and the best course of action was a new upgrade.
