

# BEADS & DOTS

---

THE MONTHLY NEWSLETTER PRODUCED BY ADSOL UK

Welcome to the August 2017 BEADS & DOTS; the monthly newsletter from the team here at ADSOL UK. Each month, we will keep you up to date with the latest news from ADSOL UK, *The hot glue machinery experts and providers of Meler's leading hot melt equipment to the UK & Ireland.*

Whether you use Meler equipment or other (*such as Nordson*), we can support you fully and save you money. Don't forget, we support our customers 24/7 with technical assistance.

*Best Wishes, from the ADSOL Team.*

ALL OF OUR TANKS COME WITH A  
**24 MONTH  
GUARANTEE**

## IT'S THE LITTLE THINGS

Hot melt systems are made up of loads of different parts; some that are niche and good for certain industries and some that are essential to any good production line. Of course you have the obvious things like the tank and the hose but there are other parts you should know about in order to maintain your systems.

First are the **nozzles**. Nozzles fit onto the end of your modules and ours come in a huge variety of shapes, sizes and types. Knowing which ones are ideal for your system can be difficult but that's what we are here for.

Next are the **modules**. Modules fit on the end of an applicator and are essential for accurately controlling the quantity and the application rate of the adhesive.

Third are the **filters**. Throughout the system there are several different filters that are important for keeping your glue from becoming contaminated and clogging. These require regular cleaning or replacement to keep your machines running smoothly.

There are many more parts to keep track of like **hose fittings**, **o-rings** and **pump seals** and if all this sounds too complicated then simply get in touch with us and let our trained engineers take care of it all for you.

### **Cleaning a DuraBlue 25 until it shines!**

One of our customers, an automotive parts manufacturer in Tyne and Wear had us over for a service recently and our engineers cleaned their messy DuraBlue 25 to perfection!

Keep your systems clean and tidy; you don't want them to clog up with old glue and char.

### **The famous Meler PC STAR controller**

The PC STAR is our most popular programmer allowing you to more precisely control your gluing to perfectly fit your production lines!

It can be programmed to automatically fire your applicators based on distance or on time to suit your needs and can be connected to 8 guns.

### **Don't forget we also work with Nordson equipment!**

We might be Meler's partner in the UK & Ireland but that doesn't limit our scope. Our engineers are trained to work with other manufacturers' hot melt equipment (*including Nordson*), so that we can help you no matter what you use. We supply the necessary compatible parts to fit other OEM systems.
